Say goodbye to VPN vulnerabilities

HPE Aruba Networking SSE is a Security Service Edge (SSE) platform that uses 500+ edge locations to elegantly connect users, and servers, to the business resources needed for work. The platform artfully integrates ZTNA, SWG, CASB and DEM into one, cloud-delivered, platform that feels weightless, and is controlled by a single pane of glass.

HPE Aruba Networking SSE capabilities are super smart and super secure.

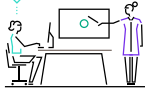

Zero Trust Network Access (ZTNA)	Secure Web Gateway (SWG)	Cloud access Security Broker (CASB)	Digital Experience Monitoring (DEM)
HPE Aruba Networking ZTNA is the most advanced ZTNA service in the industry. It fully replaces your VPN and provides secure connectivity to internal applications.	HPE Aruba Networking SWG uses advanced SSL inspection, URL filtering, and DNS filtering, and secures the connections to SaaS apps and protects users from internet based threats (eg Malware).	HPE Aruba Networking CASB mediates the connections between users and cloud applications, ensuring sensitive business data remains protected, while helping prevent cyberthreats.	HPE Aruba Networking DEM ensures user productivity by measuring hop-by-hop metrics, and monitoring app, device and network performance. IT can easily pinpoint connectivity issues, and reduce mean time to innocence.

Try before you buy

Test drive [HPE Aruba Networking SSE](#) and experience all of your secure access needs in one platform.

How to contact SSE Support

- Customer Support Portal at axissecurity.com/support

This is the preferred method, as it allows specification of the urgency of the case as well as relevant aspects of the issue and file attachments.

The customer's technical contact must be registered in advance.

- Phone via the toll or toll free numbers for our 24-hour answering service.

Phone numbers:

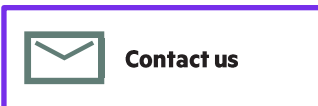

Toll-free in USA and Canada: +1-800-342-2946

International: +1 (650) 731-3088

If you don't have access, please reach out to your sales representative.
